

The most innovative, reliable and popular Snow Flake machine from Korea.

Features of our Snow Ice Machine ...

Space saving & User-friendly design with one touch function

Compact desktop machine is ideal for outlets with space constraint. Pre-set timer allows you to automatically set the time for machine to run every time you start machine to produce the ice flakes. Pre-set timer allows you to adjust the ice flakes output according to the size of your servings. Multi bowl feature allows you to make multiple bowls. Fulfill orders just with one touch of the button.

Ease of making different flavored ice with minimum fuss

Easy accessibility to mixture allows you to change mixture easily and to make different flavored ice flakes. Now you can make different flavored ice flakes based on customer's order. No more constraints to making just one flavor on your machine.

New innovative technology, Superior Quality & Reliability

Our world's first innovative technology produces machines that allows faster ice flake production and proprietary parts provides superior reliability that surpasses expectations.

Easy to clean and maintain

Easy to use and ease of cleaning after use makes our machine a popular choice amongst those looking for a reliable, easy-to-use machine. Open top concept makes it easy to clean and maintain the machine after use.

Works perfectly well with generic or specialized bingsu products

Machine is designed for use with most type of liquid input. Specially produced bingsu powder specially designed to create finer textured and better tasting ice flakes are also available for the most discerning customers.

International Warranty and Support

Warranty and service support is available for one year and you can have a peace of mind knowing we are here to provide you with warranty in parts and after sales service should you ever require them.
